

CERTIFICATE OF TEST

Samples were taken and tested to determine total alkalis following the method given in BS EN 196-2:2013.

Scunthorpe GGBS

Acid Soluble Alkalis

Table with 7 columns: Ref.No. AW., Sample Date, Na2O, K2O, Na2O Equiv., R.Mean Last 25 Na2O Equiv., and a duplicate set of the same columns. The first set contains data for samples 663 through 855.

The GGBS contained no additional materials other than those permitted. The above results and other tests demonstrate the conformity of the material sold during the month to the requirements of EN 15167-1:2006
