

*Product data sheet*

# Calcifert Sulphur BZn

Calcifert Sulphur BZn is a granulated Calcium Sulphate with added Boron and Zinc. Calcifert Sulphur BZn is used in the agricultural industry to address calcium, sulphur, boron and zinc shortages in soil. It is suitable for all crop types.

<b>Chemical analysis</b>	<b>% by weight</b>	<b>Physical properties</b>	
Total Calcium (CaO)	39	Neutralising Value (as CaO)	< 1
Total Sulphur as SO <sub>3</sub>	56	Moisture content	< 0.5%
Total Boron (B)	0.5		
Total Zinc (Zn)	0.5		

  

<b>Grading</b>	<b>% by weight</b>
Fineness before granulation < 150 micron	95
Size after granulation between 2mm - 5mm	85

*Calcifert Sulphur BZn also includes humates and bio-stimulants derived from green seaweed extracts, supplying both humic and fulvic acids.*
