

MicaFort PW150

This Finnish phlogopite mica product is specially processed to give high aspect ratio particles with a controlled size distribution.

Specified/controlled properties

Particle size distribution by wet/dry sieving

BS Mesh No.	Sieve Aperture (microns)	Cumulative % Passing
30	500	100
60	250	99 - 100
100	150	90 - 100
350	45	55 - 85

Loose bulk density

0.15 - 0.35kg/litre

Non-specified properties/supplementary information

Chemical analysis	% by weight	Physical properties	
Silicon as SiO ₂	40 - 42	Specific gravity	2.80
Magnesium as MgO	20 - 26	Refractive index	1.58
Potassium as K ₂ O	10 - 11	Hardness (Moh's scale)	2.50
Aluminium as Al ₂ O ₃	9 - 11	pH (ISO 787-9)	9.00
Iron as Fe ₂ O ₃	3 - 11	Colour L*	76.00
Loss on ignition as 1000°C	1 - 3	Moisture (%)	<0.50
		Malvern D ₅₀ (µm)	42.00

Information presented above in 'non-specified properties/supplementary information' is given in good faith but without guarantee. MicaFort PW150
Product definition, 09-05EN, 25-11.

We are leading the transformation of our industry toward a sustainable future.

LKAB Minerals, the international industrial minerals division of LKAB, develops and delivers circular, critical and climate-efficient mineral products. LKAB Minerals has sales representation, offices, production units and deposits in 12 countries in Europe, Asia and the US and employs around 400 people.

LKAB Minerals is part of the Swedish company LKAB, one of the world's leading producers of highly upgraded iron ore products and a major supplier of mineral products for other industrial sectors.
